Work Experience

Capgemini - Mumbai (July 2023 - Present)

Senior Software Engineer

- Lead development on an automobile contract management platform used by thousands of dealers, ensuring high system reliability and zero-defect delivery.
- Collaborate directly with clients to gather business-critical requirements, evaluate technical feasibility, and deliver scalable, market-aligned solutions.
- Develop end-to-end user flows and conduct rigorous testing and code reviews to meet quality standards and client expectations.

Software Engineer

- Contributed to a government initiative by developing a web-based management dashboard for the Asha Mitra program, enhancing field-level coordination.
- Designed and implemented responsive UI components and backend logic to support real-time data tracking by hundreds of users.
- Worked with cross-functional teams to align features with public-sector needs, optimizing for rural device usage and performance.
